Tuesday, March 27

2030
Monday, April 15

2031
Friday, April 4

2032
Wednesday, March 24

* A note to our readers: We have abandoned the set of detailed calculations posted on our site for many years which were accompanied by a graph displaying the Nisan 1 to Nisan 14 timeline. For those interested in such detail please write to us at <antilutron@proton.me>. Likewise, should you find an error in our figures, feel free to let us know. As always, our astronomical data is taken from *Astronomical Tables of the Sun, Moon, and Planets*, compiled by Jean Meeus (Willman-Bell, Inc.; 1983), pp. 3-43, 4-21. The volume is still in print and available from many sources.
